

Natural and transfat free. Activa is a premium fat made from the oils of freshly picked palm fruit. Activa is high in Palmitic acid, a 100% vegetable oil that promotes butterfat yields.

## Features

**Color/ Aroma**  
White.  
Neutral Odour.

**Packaging**  
25 kg bags.  
625 kg tote bags.

**Typical Feed Rate (Kg/head)**  
Lactating: 300 g to 500 g  
Calf: 50 g

**Bulk Density**  
470-480 kg/m<sup>3</sup>

### Overview

Fat is included in dairy cow diets for its high energy density to provide the animal with the energy needed to regain body condition, support high levels of butterfat yield and retain regular reproductive functions.

### Product Description

Activa is a premium fat produced from palm oil using the latest in fat processing technology. Based on long-chain, saturated free fatty acids, Activa is in the form of free-flowing flake with no objectionable odor or taste.

### Typical Analysis (Dry Matter Basis)

Nutrient	Typical Analysis
Moisture, %	<b>1</b>
Total Fat Matter, %	<b>99</b>
C16:0 (Palmitic), %	<b>90 (85 Min)</b>
C18:0 (Stearic), %	<b>2 (5 Max)</b>
NEL, MJ/KG	<b>25.5</b>
Melting Point	<b>58 C</b>
